

Natural, warm feeling light.

The concept behind Tag is significantly expressed by the encounter of two very different materials (glass and wood) working together in harmony. The stylish look and the sophisticated finishes makes this lamp the perfect choice when matching other furniture. Great for both residential and hospitality projects, there is a certain kind of warmth conferred to this piece thanks to the use of natural wood - resulting in a sustainable design choice. Diameter 30cm.

TAG

Design by Francesco de Majo
