

## VOLCANO CANDELABRA

What a fascinating design this large candelabra! The designer took an edgy take on the classical shapes of candleholders, connecting a timeless design with a raw texture and yet lush appearance. This contrast is exactly what makes this design piece so interesting. The rough surface with its natural, organic irregularity suggests the brass was allowed to find its own way, like lava does. The actual form remains symmetrical though and the natural brass or Dutch silver finish provides that lustrous and chic look. The large number of candles will bring the warmth of the brass and the intimate flames to any interior environment. The effect is pure magic.

Itemnr: **PA 603**  
Model: Volcano Candelabra  
Material: Casted brass  
Dimensions: 42 x 42 x H52 cm  
Finishes: Natural Brass, Dutch Silver
