Array  
Design by Umut Yamac

# Array

A striking pendant of impressive proportions, Array is an exploration of thread and its potential to create lightweight and dynamic sculptures of light.

## ARRAY

Composed of an array of fine technical threads pulled taut between two aluminum rings, Array presents a wide range of conical and cylindrical silhouettes that can be combined together to form a compelling installation.

The spacing distribution of the threads creates translucency and volume, whilst the layering effect gives the illusion of movement. Suspended overhead, Array emits a pleasant downlight projected from an invisible source concealed within the lower ring.

At the same time, indirect light washes upwards in a gradient of colour, enveloping rather than invading the space it occupies.
