SPARKS SYSTEM DOUBLE by Daniel Becker

Inspired by a sparkling fire, the designer created a modular lighting system consisting of three different modules with the ability to arrange various configurations to form a three-dimensional structure. The installation solutions are endless and fit in every architectural situation. Every module can be rotated freely in 360°, making the whole system easily adaptable to every possible situation. Assembling is easy due to the prewired modules that can be plugged together. Our team is available to help you with planning and designing it to suit your individual needs.
