

## Description

Night Birds differ from the other collections in the unique technology applied in production, which involves melting glass into a mold and then bending it. The process makes it possible to instill delicate nuances in the shape of the wings and achieve a coloration of the glass that is different and wholly unique each time

**Tech. description** The light consists of a metal section with lead cable and GZ10 light source socket. The glass element is suspended from the metal section. The light includes a metal ceiling canopy.
